OHA-PRÜFSTÜCK-5000

Prüfstück is a multi-functional tool that can be used when mounting wall-hung WC's or flush-mounted cisterns versatile use of flushing cisterns and reduces working hours. According to DIN 1986-3, the test of the tightness of sewage systems is mandatory. But how should this be done without the WC installed if there is no connection between the cistern drain pipe and the sewer pipe - remedy promises here is the "Prüfstück" promises. Because of its two pipe ends this can be connect. Then the box can be rinsed and the tightness checked. At the same time, the rigid connection fixes the sewer pipe with the cistern and can be firmly anchored in this position. A later warping is virtually exclude and paved the way for a smooth final assembly of the toilet without costly rework.

- It is possible to connect a connected Prüfstück with on Commercial funnel outlet, etc. put on to dispose of construction and sewage water easily.
- When closing the pre-wall mounting system with plasterboard walls and later tiling the product can serve as a template. This way, tailor-made tile cut-outs in a fixed 135 mm grid center distance are made possible.
